Air Mail Service.

Starting on Monday last, a daily air mail service was begun between Edmonton and Regina (calling at Saskatoon) leaving Edmonton at noon each day, the trip being made in 5 hrs. 45 min.

Mail on this route must be prepaid at the rate of 50 first oz. and 10c each additional oz. This service speeds up the delivery of letters to Winnipeg and Toronto by 24 hrs.

Mouth Health Campaign

An essay contest open to school children from grade 7 up is being conducted at the present time. The province has been divided into 22 districts and \$10 will be given for the best essay in each district. The one adjudged to be the best in the province will be given \$25. Subject of essay "Mouth Health," essay not to exceed 750 words in length.

Party at the Becker Home.

In honor of her guest (Miss Olive Lane of Edmonton) Miss Vera Becker entertained a number of her friends on the evening of Saturday, Feb. 22, at the home of her parents, Mr and Mrs J Becker, 4th St. west, when games, cards and dancing helped pass a very pleasant evening.

Among those present were: The Misses Florence McKinley, Cassie McKinlay, Edith Oatway, Esme Malloch, Marie Clarke Saunders Everett, Susan Miller, Olive Lane, Vera Becker, Ruth Wight, Esther Peters; Messrs Giles Clarke, Clarence Anderson, Walther Peters, Bert Leeder, Hilding Larson, Gwynne Davis, Alf Davis, Jim Alton, Clarence Senger, Bert Becker, Manly Donaldson, Sam Gabel.

School Teacher Estray.

EDITOR SUN—Dear Sir: I read with interest the account in last week's Sun of the elevator man who received promotion after he had his brain removed. While living in Winnipeg some years ago I remember reading of a somewhat similar case. A young immigrant from Mittel Europe whose education had consisted of several weeks' schooling in his youth had arrived, was put under surveillance for some reason, and it was decided to remove his brain. When the operation was completed the surgeon was called to the phone, and the young man, feeling alright, got up and wandered out into the street.

He wasn't heard of again for two years, when he was located in a southern Alberta town, teaching school—and receiving good reports from his Inspector. Yours,

B. MUNCHAUSEN.

Production and Marketing Problems

The question of disposing of surplus farm products in an orderly manner, and thus prevent disastrous breaks in prices by reason of the throwing of a large portion of the surplus on the world's market at one time, all with a view to securing to the producer a fair margin of profit over and above costs of production, is peculiar to the wheat growers of Western Canada. It is a problem which confronts agricultural producers in many countries, and applies to other products than wheat.

Governments and producers are grappling with the problem. In Canada it is wheat; in the United States it is wheat, cotton, and, as affecting its overseas markets, sugar. Cuba, in which the U.S. takes a friendly interest, is sugar; in Brazil and other South American countries it is coffee; in certain British colonies it is rubber.

Each case is the problem is a most complicated one. Such factors as world consumption; world production, fluctuating with variable seasons from under-production to over-production; the ability of importing countries to pay the price demanded as fair by the producing and exporting countries; different seasons and methods of marketing; costs of labor and marketing in one country as contrasted with those prevailing in other competing countries, all enter the picture and call for consideration.

In the Argentine, for example, orderly marketing as we would develop it in Canada is impossible. In that great wheat growing and exporting country there is no elevator storage system. When the crop is harvested it must be rushed on to the market at once, and the growers are obliged to accept the price they can get for it at that time. If the crop is large, if there happens to be a substantial world's surplus at the time, the effect is to force down world prices, with resultant loss, not only to the Argentine grower, but to wheat growers everywhere. The Canadian Wheat Pool had to face just such a situation in 1929-30.

The International Agricultural Federal Farm Board has been created and given a huge sum of money to use in an effort to stabilize prices of agricultural products in that country. That Board is now facing its first test. It has called upon the farmers to reduce production of cotton and wheat in 1930, by planting smaller crops. Will the farmers as a whole, or even a majority of them, respond? Or will the individual farmer act on the belief that, inasmuch as other farmers will follow the advice of the wheat pool, it is a good opportunity for him to increase his own production and secure the benefits provided as a result of the proposed general reduction? If so, then there is grave danger that a greater surplus than ever will be produced.

Great Britain tried the experiment of controlling the rubber markets of the world. For a time it succeeded; but just as soon as the world consumers, rubber and otherwise, had got used to the new prices, and reduced production, will advantage not be taken of it by wheat growers in competing countries to increase production, thereby defeating the object aimed at in world markets, and reap any benefits resulting from the sacrifice made by the rubber producers?

In a word, can the volume of production of such a world commodity as wheat be controlled? Is it possible to control the output of manufactured articles, say, automobiles, boots, furniture, clothing, but not the production of nature's own goods from the soil? Is it controlled, like lumber, by any article of commerce? Is it controlled by the weather, or by the whims of the weather?—drought, heat, too much rain, plant disease and insect pests?

Great Britain tried the experiment of controlling the rubber markets of the world. For a time it succeeded; but just as soon as the world consumers, rubber and otherwise, had got used to the new prices, and reduced production, will advantage not be taken of it by wheat growers in competing countries to increase production, thereby defeating the object aimed at in world markets, and reap any benefits resulting from the sacrifice made by the rubber producers?

Take the case of coffee. Brazil produces two-thirds of the world's supply of coffee. The Brazilian Government, to protect growers against price fluctuations, organized the Commodity Control Commission. The law was not empowered to ban, but merely to set a limit coffee was kept in the interior, and released to exterior markets only when and as the demand and price-level were favorable. In the first few years of operation the Instituto and world realized. The 1924-25 crop prices were almost exactly the same as the 1929-30 crop, and there were no price fluctuations. There was one inevitable outcome. Higher prices for coffee and the rest of the world's coffee. The rest of the world no longer influenced the world market as much as previously. We were compelled to buy coffee from other countries because the war was only 6,000,000 bags a year, today it averages 14,000,000 bags a year. In 1929-30, Brazil went in more extensively for coffee growing. Following an average output of 14,000,000 bags annually during the decade beginning 1917, the crop production of 1927-28 reached the unprecedented total of 28,000,000 bags, or well above the estimated world consumption of 22,000,000 bags a year.

Then came the inevitable result. In October last, prices broke, and in January of this year the price for coffee were just one-half what they had been at the same period a year before. The result is in Brazil today a curtailment of credit, much unemployment, a cutting down of high-grade municipal undertakings, a loss in foreign contracts, and a lessening of buying power in the other coffee countries of Colombia, Venezuela, Costa Rica, Salvador, Nicaragua, and Ecuador. The estimated world's supply of coffee for 1929-30 is 45,250,000 bags, while the world's demand is placed at 23,000,000 bags, leaving an unsold surplus on July 1st next, to carry over of 22,250,000 bags, or nearly one-half of the total.

One of the leading United States agricultural weeklies, "Wallaces' Farming," published at Atlanta, Georgia, said: "When we last saw the coffee and British rubber," saying, "when we last saw them in position to control price, it is important to forget about cost-of-production theories. In a case of this sort, the only excuse for studying cost of production is to get into the point at which prices must be held in order to discourage other people from getting into the same business. The goose that lays the golden egg, by stinging her to death. The important thing is to price a little too low, and apparently this is the one thing that every organization failing it gets to learn."

Directors of the U.S. Federal Farm Board's plan to curtail production. One leading paper declares: "It is a distinct disservice to agriculture and to our economic structure in general to preach the doctrine of a sharply curtailed production from the farms to the cities, and with that either increased factors of production, credits, and supplies, and that now exists in agriculture, or an aggravated unemployment problem?"

The magnitude of the problem confronting our farmers, our Wheat Pool, our financial and business men, our Governments, can hardly be overestimated. Because of the world's economic condition, the result will which will flow from success or failure in finding a solution, is the duty of all our people, in city and country alike, to stand unitedly behind those who are earnestly seeking a solution, and who are carrying an extremely heavy load of responsibility. It is a case where all must pull together, where carpentry criticism should be silenced, and the professional pessimist and preacher of blue ruin squelched.

Soviets Seize Jewelry

Diamonds, precious metals, jewelry, foreign currency, antarctic articles and other private property amounting to 100,000,000 rubles (about \$50,000,000), have been seized from private traders and other classes in Moscow, described as "parasitical" for payment of taxes owed to the government.

Made Wonderful Flight

Albatross Kept Up With Ship For 5,000 Miles

The flying powers of the albatross are well known, but news of an almost incredible feat of endurance has just been reported by officers of a Pacific liner from the Far East. For six days and nights an albatross followed the vessel, which averaged seventeen knots, and it was only when a school of fish was sighted that the bird abandoned the chase in order to feast. It was estimated that the bird had flown 3,000 miles, and what is more remarkable had apparently gone without food all the time.

**SUFFERED FOR YEARS
FROM NEURITIS**

Electric Treatment and Osteopathy Proved Of No Avail

To suffer for four years from neuritis. To try electric treatments, osteopathy, have teeth and tonsils removed without receiving the least benefit was the experience of Mrs. Elmira E. Smith of May's Out. Today, however, Mrs. Rae is a well woman—thanks to Dr. Williams' Pink Pills. These Pills have cured her what other remedies had failed to do. They built up her blood and banished all the aches and pains.

Concerning her suffering and relief Mrs. Rae says: "I suffered from neuritis, and rheumatism for four years. I was almost a cripple, and the pain I endured was terrible. I took sixty electric treatments, but the results were nil. I consulted a doctor, and he advised me to try Dr. Williams' Pink Pills, and more to please her than anything else I did so. Imagine my joy on noticing an improvement in my condition after taking the pills only a few boxes."

Concerning her suffering and relief Mrs. Rae says: "I suffered from neuritis, and rheumatism for four years. I was almost a cripple, and the pain I endured was terrible. Enormous Annual Losses Suffered By Farmers Due To Ravages Of Smut And Other Plant Diseases

The word disease generally brings to our minds a suggestion of some ailment which has fallen to the lot of man or beast. It rarely occurs to us that plants are subject to a line-up of disorders, which would make the average sufferer from human ailments well by comparison. It is also true that the cost of plant disease is quite comparable to the money spent every year by the doctor bills and the money lost through sickness.

Take our common smuts for example. They are plant diseases when we come to consider the matter, and are among the most expensive luxuries which the farmers of Western Canada annually indulge in. In fact they probably cost the average farm considerably more than the car, for we learn that oat smuts alone cost the farmers of Ontario some two and one half millions. If a horse is laid up for a quarter of the year with a bad smut, we soon think of the money it is costing to feed him, but we can slip in and take a quarter of the oat crop and the loss is never noticed.

The smuts are bad enough, but as every farmer knows, they are largely preventable. The worst offenders are the rusts, they are harder to deal with and, while the development of rust resistant varieties of wheat is now only a matter of time, we still lose several millions annually to those little spots on the stems which might be called the smallpox of plants.

But the smuts and rusts are only a beginning. There are cankers and galls, the potato has an imposing lineup of blights, rots and scabs, the fruit trees have their diseases from root to fruit. The loss caused by plant diseases each year is very nearly as great as the national debt. Most plant ailments are now preventable in the same way that disease has been removed from human ailments under control, and with the additional possibility of breeding disease resistant plants, it is likely that in the next few years we shall see a decided reduction in the losses due to the diseases of plants. It is interesting, however, to remember that our human ailments are not the only ones which prove costly and which reduce our national efficiency.

Studying Cement Treatment

Saskatchewan University Professor Spending Some Months In Berlin

Professor Thorberg Thorwaldson, of the University of Saskatchewan, building cement expert, is here conferring with Prof. Wilhelm Etel, of the Kaiser Wilhelm Institute for the Advancement of Science, with a view to finding methods of improving cement.

Prof. Thorwaldson explained he was particularly interested in observing the X-ray work on crystals, carried out by Prof. Etel, who is one of the greatest authorities on silicates.

"In our part of the country, cement is an important commercial article, and everything that can be done to improve its quality is of vital interest. I am the combining scientific research with practical purpose by seeing in what way Etel's methods can be applied to cement," he said.

Prof. Thorwaldson expects to remain here for three or four months.

"Your uncle is 90 and still mentally active?"

"Yes, he plays chess every evening."

"Is he still physically active?"

"Rather. If he does not win he hits his opponent over the head with the chess board."—*Fliegende Blätter*, Munich.

Suggests Settlement Plan

Soldiers' Settlement Board Supervisor Has Idea Of Colony
A scheme for future land settlement was outlined at Hudson Bay Junction before the Royal Saskatchewan commission on immigration and settlement by Captain A. A. Batchelor, supervisor of the Soldier Settlement Board for the west.

"A block of land, consisting of a township or more, should be selected," he said, "and fields of 50 acres cleared and cultivated on alternate sections. A main road should be built and a barn and water supply provided for each farm. A school and a central community hall, which could be used as a church, should be built. The selected family from Great Britain should be placed on this land, which would be sold to them at the actual cost of improvements."

The taking of such land, according to Captain Batchelor's scheme, would mean the forfeiture of any homestead right. He would have the alternate sections treated in the same manner after a period of two years from the first settlement, and these thrown open to Canadian people on the same basis.

Not Ready For Zoo

Horses Are Being Used More Than Ever In Chicago

Not long ago the city fathers of Chicago were thinking of setting aside a pasture in Lincoln Park Zoological Gardens for the horse as a rare animal, but now city life is offering excellent careers for young horses willing to work as haulers of milk wagons, ice vans, and fruit trucks, with the prospect of a nice green field in 20 years. Horses have shown a remarkable revival in Chicago, where 10,741 horse-drawn vehicles were registered in the first seven months of 1929, as against 11,986 in the whole of 1928.

Always throw a drowning man a rope, even if he's trying to commit suicide. If the water isn't deep enough, he may want to hang himself.

LEADING AGRICULTURIST

With fifteen years practical experience in agricultural and livestock fairs and having represented Canada on an Imperial committee to study the question of the British Empire, Leonard Christie McOuat has recently been appointed general agricultural agent of the Canadian Pacific Railway. He was born at St. Andrews, East, Quebec, in 1892, and took his degree of Bachelor of Science in Agriculture at McGill University. After returning from military service in the war, Mr. McOuat was called to Ottawa as a bacon specialist of the Dominion Livestock Branch, Department of Agriculture, and, following a special study of the British meat market, was selected to join the first Imperial Economic Committee to investigate and report on British Empire meat which met in London, in 1925. His wide knowledge and experience are now at the service of the Canadian Pacific Railway.

Another Non-Sleeper

Man In England Claims He Has Been Awake Twenty Years

An amazing record is claimed by E. T. Maher, of Heaton, Newcastle, England, who affirms he has not slept for 20 years, according to the Manchester Guardian. Mr. Maher, who works as a store keeper in Newcastle, was known as the "battalion" caller up, whilst serving with the York and Lancaster Regiment.

He has undergone several operations, but the doctors are still baffled. It is stated that they can neither explain the affliction or cure him.

Study Of Dairy Conditions In Canada During The Past Decade Is Well Worthy Of Attention

Canada's Exhibits At the Poultry Congress

Each Province Is Working On Its Own Display

Canada will occupy a conspicuous part in the forthcoming World's Poultry Congress. No pains are being spared to put full advantage of the opportunities provided in putting up exhibits that will be a credit to the country.

The national exhibit being prepared on an elaborate scale by the Live Stock Branch of the Department of Agriculture, at Ottawa, will demonstrate clearly the policies that have developed the Canadian poultry industry to its present enviable position, but will also show the effect of the policies in operation upon poultry and egg consumption.

The provinces are preparing their displays that will draw attention to not only the poultry industry, but other activities of world interest. The Maritime Provinces are getting together in putting up one exhibit. The Prairie Provinces are coordinating their efforts in a similar manner, while the other provinces are each preparing elaborate displays for definite spaces that have been allotted to them in the great Crystal Palace.

The Live Birds Exhibit of one thousand head, including chickens, waterfowl and rabbits, is being arranged on a national scale, and will include representatives not only of the hardy, high-producing stock of the most popular birds, but will also include representative specimens of what are sometimes termed "Fancy Breeds" and including waterfowl and pigeons.

The exhibits will be a credit to Canada.

Byron's Home Purchased

Historic old Newstead Abbey, famous as the ancestral home of Lord Byron, has been purchased by Sir Julian Cahill for presentation to the National Trust. The purchase was effected through the intermediary of Sir Julian. Cahill is a noted philanthropist and sportsman. By owning a half share in the Stock Exchange sweep ticket on Trig, Derby winner of last year, he won \$310,000.

With the round of dairy conventions in the prairie provinces complete for 1929, some facts and figures issued by J. F. Singleton, acting dairy commissioner, are of interest.

A study of dairy conditions from 1920 to the end of 1929 shows that there are fewer establishments turning out butter, cheese and milk products, but the number of producers of milk has increased; that there has been an increase in the total production of milk, and in the number of cows in a herd; that the production of creamery butter has increased materially while that of cheese has decreased; there has been no material change in the production of evaporated or condensed milk, but a very decided increase in milk powder and condensed skim-milk; there has been an increase in the total milk production and also a greater volume has been produced per establishment.

Between 1920 and 1927, with the exception of the province of Quebec, which is not included, Canada increased her creamery butter production 60.9 per cent. and decreased cheese production 7.8 per cent. The quantity of milk used for immediate consumption increased 48.9 per cent. and the quantity of cream sold, calculated in terms of butter increased 54.9 per cent. The total number of cows increased from 1,599,145 in 1920, to 2,124,382 in 1927.

In 1929 Canada imported 32,182,486 pounds of creamery butter, valued at \$11,424,476, and 2,002,470 pounds of cheese, valued at \$597,782. In the same period Canada exported 1,480,600 pounds of butter, valued at \$167,483, and 93,556,100 pounds of cheese valued at \$18,752,660, and 2,416,479 gallons of cream, valued at \$4,999,026. In 1928 the total value of dairy products imported into Canada was \$1,385,653, and the total value of exports \$27,963,673, leaving a net value of exports over imports of \$16,588,020.

The increase in total consumption of butter, cheese, milk and ice cream expressed in terms of fat equivalent was 143,028,288 pounds.

The figures show that there is still room for a very considerable increase in the per capita consumption of cheese and also the indication is pretty plain from the per pound value of exports over imports that sometimes it may be economically sound to export at some seasons and import at others.

The imports of butter were, of course, mainly from New Zealand, and George Barr's advice to Ontario creamery men may also apply to manufacturers in this country: make your whole output so good that the consuming public will be glad to pay more for it than they would have to pay for New Zealand.

Used To Credit Sales

Clerk Was Astonished When Offered Cash For Purchase

A New York paper says: A big merchandising event came recently when a young couple from out of town, who have just settled down in the East Nineties, went to Sloane's to buy some chintz curtains. They gave the clerk who waited on them the exact amount of the purchase in cash. He stood staring at the money. "What's wrong?" asked the husband. "Well, sir," said the clerk at last, "I've worked here many years, but I never made a cash sale before and I scarcely know what to do with the money."

BRISKER DEMAND FOR POOL WHEAT IS ANTICIPATED

Montreal.—As a result of conferences held in London between representatives of the Wheat Pools, the British Government and the British Milling Association, there is the strongest reason to believe that purchases of Canadian Wheat in future will not only be increased but will be made in an orderly manner covering the crop year.

A. J. McPhail and W. A. McLeod, the Wheat Pool representatives who conferred with the British Government and the Milling Association, declined to be quoted in regard to their mission. Neither would they issue any statement except a brief note dealing with the conferences with Rt. Hon. J. A. Thomas. This note is couched in very definite language.

Informally, it was learned that the conference in London failed to achieve the results entertained by Mr. Thomas while in Canada last autumn.

Mr. Thomas had a plan whereby the export movement of wheat to Great Britain could be regulated. In the past the export of wheat has been irregular. There have been very heavy outward movements in some months and practically none at all in other months. In the seasons of glut much of the grain has been carried in transoceanic ships which carried little or no cargo other than wheat.

Mr. Thomas was inclined to believe that if the British Government built large storage elevators in England a steady movement of wheat from Canada could be assured. This would tend to provide freight liners with cargo the year around and might go far to solve one of the greatest obstacles in the way of increased trade between the United Kingdom and Canada. He believed a steady western movement of freight might be built up if the eastward grain traffic was regulated.

It is understood that in the preliminary discussions between Mr. Thomas and the officials of the wheat pools last autumn, the officials were rather dubious of the scheme. They pointed out that it is believed, that they did not favor sending wheat to Great Britain, unwillingly, until they preferred to sell the wheat before it left American ports.

In the discussions which took place in London, it is understood that this view prevailed, and that Mr. Thomas has abandoned all intention of building storage elevators in the United Kingdom.

The discussions, however, revealed that the objective might be achieved in another way. It was felt that if the British Milling Association, which controls more than 60 per cent. of the milling industry in Great Britain, and is, therefore, the largest importer, would undertake to buy Canadian wheat steadily instead of entering the market only from time to time and buying heavily — it was felt that if this could be brought about the desired result would follow.

To that end it is understood that Mr. Thomas, after holding several consultations with the wheat pool representatives, met the Milling Association. Finally there was a joint meeting between Mr. Thomas, the Milling Association and the wheat pool officials. The outcome, it is stated, was an informal agreement.

The Milling Association in future will endeavor to import Canadian wheat steadily.

This explains the statement made by Mr. Thomas to the effect that the conference with the wheat pools probably will have beneficial effect upon British Canadian Trade.

Seeking Speed Record

British Racing Motorist Aims At 250 Miles An Hour

Southampton, England.—The noted British racing motorist, Kaye Don, sailed on the "Berengaria" for New York en route to Daytona, Fla., where he is attempting to set a new speed record with his recently constructed "Silver Bullet" machine.

"I have every confidence in my car," he said before sailing. "I hope within a month to establish a mark which—with a little luck—may be 250 miles an hour."

Well Known In Canada

Cardinal Merry del Val Dies At Vatican After Operation

Rome.—Cardinal Merry del Val, foreign secretary and secretary of state and in recent years archpriest of St. Peter's, died from heart failure after an operation for appendicitis.

Cardinal Merry del Val was secretary of state under Pope Pius X. He was particularly well known in Canada.

In 1886 he proceeded as papal delegate to Canada to report on the adjustment of claims of the Canadian bishops as to separate schools in Manitoba. He was protector of some religious orders in Canada, among them the Sisters of Charity, known as the Grey Sisters of Canada. Cardinal Merry del Val was one of the most distinguished figures in the modern history of the papacy. He was made a cardinal in 1903 at the comparatively early age of 38 and forthwith was created secretary of state to Pope Pius X.

The cardinal was of noble Spanish birth. His father was Spanish ambassador to the court of St. James when the future cardinal was born in London, in 1856.

Nine Lose Lives In Fire

Mother Superior and Eight Children Perish In Northern School

The Fas.—Eight Indian pupils and a mother superior of the Cross Lake School, 123 miles northwest of here, were burned to death when fire raged through their school several days ago, according to word relayed in here by Indian runners.

Only meager details of the tragedy were known, and it is not known what caused the fire originated. The Cross Lake School was a stone structure, and was valued at \$30,000.

It is thought that the fire started on the third floor of the building, in the west part of the main section, where the Indian girls were quartered.

The sister superior died in a brave attempt to lead some of the children through the flaming building to safety. All of the children who perished were under nine years of age.

Left Fortune To Charity

late W. F. Alloway Bequeaths Huge Amount To Foundation

Winnipeg.—The Winnipeg Foundation, a charitable institution, is bequeathed \$1,200,000 by the will of the late Mr. W. F. Alloway, who left an estate of \$1,244,000. The sum of \$216,000 is set aside for the purpose of paying the income to certain relatives of Mr. Alloway and his personal effects. On the death of each beneficiary the income reverts to the Foundation.

During his lifetime Mr. Alloway made gifts to relatives which are said to total \$100,000. Mr. Alloway died on February 2.

Mrs. Alloway, who died in November, 1926, left her estate, amounting to \$733,881, to the Foundation. The gifts of Mr. and Mrs. Alloway to the Foundation now total \$2,000,000.

Australia Recalls Trade Commissioner

Government Displeased By Speech He Made Is Report

Sydney, Aus.—Australia's trade commissioner at Ottawa, R. A. Hayes, has been recalled by the Commonwealth Government as a result of a speech he delivered in Canada, it is understood.

The Australian Government is said to have been displeased by alleged references of Mr. Hayes to more peaceful conditions in Australia than in Australian industry.

The Federal Government is said to have considered that such utterances were harmful to the Commonwealth's prestige abroad.

Would Deport Drunken Drivers

Deportation for one year of U.S. citizens found guilty of driving autochairs drunk in Canada was urged by deputy magistrate Arthur Hanrahan of Windsor, at the meeting of the chief constables' association of Essex and Kent counties, held at Windsor.

Five states have abolished fixed speed limits for automobiles.

MAKES IMPORTANT DISCOVERY

Dr. J. B. Collip, chairman of the Department of Bio-chemistry, at McGill University, and co-worker with Dr. F. G. Banting, in discovery of insulin, who has succeeded in isolating a gland extract of great value in relieving certain disorders.

Safeguard Canadian Wheat

Proposes Tax On Export Wheat Going Into United States

Ottawa.—With the view to preventing the mixing of Canadian wheat exported through United States ports, J. G. Ross (Liberal, Moose Jaw), presented a resolution in the House of Commons calling for a tax of 10 cents per bushel to be paid when the wheat entered the United States, and rebated when exported from an American port.

The tax, he suggested, might be paid either in cash or by filing a bond and the rebate would be conditional upon the wheat being up to Canadian standards on leaving the United States.

There was no doubt, Mr. Ross contended, that mixing Canadian wheat with American wheat and with lower grades was being carried on in the United States. He wanted some provision to safeguard the value of the Canadian certificates issued by the board of grain commissioners.

This could only be done by inspection at the time the wheat left the United States.

Furthermore, he said, the measure would tend to place Canadian ports in a better competitive position. Restrictions now placed on the handling of grain with the effect of discriminating against Canadian channels and Canadian ports. The resolution was finally withdrawn, but will come up again in the agriculture committee.

Five years' imprisonment and a fine for driving an automobile in a manner dangerous to the public and thereby causing an accident are proposed.

Five years' imprisonment and a fine for failing to stop and render aid and particulars as to ownership of car when an injury is caused by dangerous driving are suggested.

Insurance For Canada's Unemployed Predicted

Premier King Hopes Plan Will Soon Be Worked Out

Ottawa, Ont.—Eventually Canada will have a system of unemployment insurance, Premier Mackenzie King predicted, in replying to a delegation seeking Federal aid to municipalities and provinces on unemployment relief. This, he said, was the only constructive way to deal with the unemployment situation and he hoped it would soon be possible to work out an insurance plan.

Seasonal incomes in the way of rents and public works were of no permanent assistance, and an insurance plan offered the only constructive way of avoiding distress. Under it those who expected relief and those who employed them would be compelled to contribute to a fund during their periods of employment, and would receive benefits when out of work.

While efforts had apparently been made by Mayor Webb, of Winnipeg, pursuant to the decisions of the recent conference on unemployment in the Manitoba capital, to secure representation from all parts of the country on the delegation which recently presented the case for unemployed relief, it was significant that only the large cities of Western Canada were represented.

Asks Tighter Motor Laws

Bill Introduced In Federal House By T. L. Church

Ottawa, Ont.—"Hit and run" drivers especially will be subject to drastic punishment if a bill introduced in the House of Commons by T. L. Church (Cons., Toronto Northwest) becomes law.

The penalty of death is proposed for causing the death of any person by reckless or negligent or furious driving and failure to render aid and reporting the accident.

Two years' imprisonment, or a fine or both fine and imprisonment, are suggested for reckless driving.

Five years' imprisonment and a fine for driving an automobile in a manner dangerous to the public and thereby causing an accident are proposed.

Five years' imprisonment and a fine for failing to stop and render aid and particulars as to ownership of car when an injury is caused by dangerous driving are suggested.

Royal York Addition

Outlined in above cut is shown the addition of 160 rooms to the Royal York Hotel, which even before this enlargement was the largest and tallest in the British Empire. It brings the total number of special suites in the hotel from 62 to 68 and increases the number of rooms to 1,164. The addition rises twenty-one stories above the mezzanine floor bringing it into conformity with the height of the rest of the building, except, of course, the tower.

The new wing will be ready for occupation by June, in time for the monster Shriners' convention slated to be held at the Royal York and to accommodate which a town of sleeping cars and marques, entitled "Fee City," will be erected by the Canadian Pacific Railway.

FARMERS REJECT PROPOSALS TO ENTER POLITICS

Saskatoon.—By a narrow margin of nine votes the United Farmers of Canada (Saskatchewan section), defeated a proposal having for its object the participation of the organization in politics as an active unit.

The vote was 314 to 305.

The resolution was in form of an amendment to the constitution which, if adopted, would have paved the way for political action.

Farmers of Saskatchewan — Canada's greatest wheat-growing province — went on record as favoring compulsory pooling of commodities. After long hours of debate, United Farmers of Canada (Saskatchewan section), gave almost unanimous approval to a compromise resolution presented by the board of directors. Under the resolution, all the farms of the farm board are ordered to "Stand ready to work with the Wheat Pool board of directors or the directors of any other pool in requesting that there be placed in the statute books of Saskatchewan an act known as the Primary Products Act, whereby the growers of any commodity may obtain control of the marketing of that commodity grown in the provinces.

Only three dissenting votes marred unanimity of support, according to the statement of the publicity committee, given out after the convention behind closed doors. The approved resolution stated that it is expedient that farm producers should be able at all times to express their opinion on and obtain, if they so desire, 100 per cent. commodity marketing control of all or any primary product."

Details of the manner in which the proposed Primary Products Act would be worded are not contained in the finally-carried resolution. The details, if specific, are to be dealt with by a committee appointed from and by the boards of the United Farmers of Canada, and the Commodity Pool concerned. A board resolution published in the Delegates' Handbook, outlining possible legislation, was not given approval.

According to this resolution, later substituted in the original petition by one-fifth of the producers of any commodity would bring a general plebiscite among such producers as to whether they desired compulsory pooling. Should the vote result in two-thirds of the vote cast favor law-enforced 100 per cent. pooling, the commodity would be declared a commodity under the Primary Products Act. At a date set by the government, commodity producers would elect delegates or directors to control marketing of the commodity in question.

While no specific procedure is mentioned in the approved resolution, it is generally considered that first compulsory pooling will be preceded by legislation all grain grown in Saskatchewan through the wheat pool. Directors of the Saskatchewan Wheat Pool, with whom the U.F.C. directors must "Stand ready to act," have declared no definite stand. President A. J. McPhail has spoken against the compulsory pool, but L. C. Brouillet, vice-president, is an avowed adherent.

Formation of a compulsory wheat pool in Saskatchewan — which, of course, would have to be preceded by legislation and by a two-thirds vote of the province's wheat producers — would mean that some 60 per cent. of all Canada's wheat crop would be handled by the Saskatchewan pool. In the 1928-29 season, the Canadian Pool handled 235,000,000 bushels of a total wheat crop of 547,000,000 bushels — and of the pool total some 157,000,000 bushels were raised in Saskatchewan.

Regrets Illegal Seizure

Washington, D.C. — The United States has expressed its regrets to Canada for illegal seizure of the motor boat 210-P at the St. Clare River last September. The seizure took place in Canadian waters.

A new type of cactus has been found in South America with long slender leaves resembling snakes.

Calendar.

MARCH—
6—Town Council meets.
14—Conrad Gabel's Sale.
15—Stony Plain Local of U.F.A. meets.
15—Auction Sale in Stony Plain.
17—Pete Baron's Sale.
22—August Burger's Sale.

Church Services.

Services in St Philip's Church next Sunday, 10:00 a.m.

United Church service every Sunday Evng. at 7:30.

During March, English Lutheran services in Stony Plain will be held March 9th and 23d.

Masquerade at Muir Lake

The dance floor was filled to capacity at the masquerade dance in Muir Lake Community Hall, Friday Evng. last, and all enjoyed themselves in a hearty manner to the music supplied by Barth's orchestra. The prize for the best dressed couple was won by Miss Amy Bauer and Mr Otto Hoffman (Carvel); Men's 1st went to Hugo Mueller; Ladies' 1st to Miss Minnie Zeiler.

An Old Friend Heard From.

Karl Pfeifer, a former restauranteur in Stony and who left here four years ago to pay a visit to friends in the old home town in Germany, has been heard from. In a letter received here last week Karl tells of the hard times which are being experienced by the residents in parts of Germany. A delicatessen shop he had been operating was closed owing to trade depression, and numbers are receiving relief from the Government. Those of Canadian citizenship are not eligible for any assistance.

Karl wishes to be remembered to all his old friends and customers here; and it is easy to surmise he wishes we were back in Sunny Alberta.

The Katzenjammer Korner.

Bert—The Prof. says I've gotta hav a real original poem by tomorrow. Can yah help a feller?

Walt—Sure, try this one "The man who made that wingless hen must be a real fine wizard. The matter don't concern me much as I always get the gizzards."

For Sale, 75-acre farm, the NW 24 52 284v. Apply to Jacob Enders, Stony Plain. 99

For Sale—White Leghorn Setting Eggs from R. O. P. stock. \$1.25 setting. Mrs W. Hopkins.

For Sale, Bees—All parties desiring a start of the best Italian bees, to be delivered next Spring, in May, should have their orders booked not later than the month of March. J. Q. Adams, Apistar, Holborn. 99

For Sale, Purchased Barred Rock Cockers \$2 each. Pearl Guinea \$2.50 pair. Goo Liebert, phone R119. 96

For Sale, 6-Room Semi-Bungalow; garage built in; including 5 lots. Apply Karl Strauss. 98

For Sale, Farm of 160 acres, 145 acres under cultivation; good buildings and good wells. 2 miles east and 3 miles south of Stony Plain. Louis Scheppe, phone 608.

Lost, Bay Team, Horse & Mare; horse has white face, blind in 1 eye; mare blind in 1 eye, has rope halter. Otto Klosek, Heatherdown.

Spruce Grove News

On Sat. March 1, to the wife of Mr John H. Miller, twins (boy and girl).

Mr and Mrs Cook were Sunday visitors with Mr and Mrs C. Brabbins.

Mrs W. J. Connolly, who had been undergoing treatment at the Edmonton General hospital, returned home on Monday.

Mr Walter Brax, Connolly Mercantile's popular salesman, is at present suffering from a severe cold.

Miss Wheeler, Graminia, is at present attending Mrs H. L. Morrow.

Mr and Mrs L. Piercy spent a social evening, Friday last, at the home of Mr and Mrs M. McLean.

Mr A. Spence, Edmonton, was a Sunday visitor with Mr McLean.

Among those from this district who attended the Old-timers' dance in Edmonton Friday night were Mr and Mrs Fred Goebel.

The Busy Bee club are holding a series of quilting bees at the present time.

Mr F. T. Cook gave an interesting lecture on "Health" in the schoolhouse, on a recent date.

Spring must be here! A resident of the town was seen sporting a straw hat a few days ago.

The official figures in the recent municipal election are: Div. 1, Councillor Latimer had a majority of 22 over W. Evans; Div. 5, Councillor Hagen 128, George Bevington 56.

A meeting of the Ladies' Aid will be held tomorrow (Friday) evening at the home of Miss Pinchbeck.

An illustrated lecture was given in the United Church Tuesday evening by Captain Gibson on mountain climbing in the Rockies.

There was a fair attendance on Sat., afternoon in the hotel parlors, when the farmers connected with the U.G.G. and A.W.P. met, to discuss matters. Several interesting addresses were given.

On Saturday last Mr Fred Gabel sold to Butcher MacKenzie a carload of prime beef cattle, top price being paid. There have been shipped in the City.

There was a representative crowd from the Grove to see the playlet "Her Honor the Mayor," produced by the Cathedral Dramatic Society at Winterburn Hall, on Monday March 3d.

Gastronomes Foregather

"**L'Édiner des Gastronomes**" or the dinner of the experts in food was held recently at the banquet room of the Place Viger Hotel, Montreal. The saying is that human life is divided into two parts: those who eat and those who live. An elaborate layout shows the rarer variety, the gourmets who like their food daintily served and exquisitely chosen with rare vintages thrown in for good measure. The dinner was held under the auspices of the Chambre de Commerce, and the guests were the Councilor of France, Edouard Gauvin, centre of the group; at his left, Hon. J. D. Bouchard, Speaker of the Quebec Parliament; and at his right, Alderman Leon Trepander, leader of the Montreal City Council.

Spruce Grove, Alta.

2 Glasses Water, Not Too Cold, Help Constipation

One glass water is not enough—take 2 glasses a half hour before breakfast. You get quicker and better results by adding a little simple glycerin, saline, etc. (known as Adlerika) to one glass.

Unlike other remedies, Adlerika acts on BOTH upper and lower bowel and removes old poisons you never thought were in your system. Adlerika stops GAS and sour stomach in 10 minutes. Relieves constipation in two hours. J. F. CLARKE, Druggist.

CHAPTER III.—Continued

"A very green hat?" questioned the doctor.

"Exceedingly green," replied Charman. "Have you made its acquaintance this soon?"

"No, but we passed it on the road, or more correctly speaking, on the girl. I'll say it was some hat."

"It came from Chicago," sighed Charman. "It was ordered by mail. Are you aware what a—a—distinguished thing it is to order a hat by mail?"

Though she spoke soberly, the corners of her mouth refused to remain sedate, and the doctor burst into a hearty laugh. They were chatting like old friends when they joined Grandma a moment later.

"You seem to be having a real good time," she commented. "Sit down, both of you. No use wasting your strength standing when it's not necessary. The doctor's over to the Oldhams' giving Suzy a talking-to, or I miss my guess. She's been feeding her baby mine pie again. At least, I think she has for the poor child's in a spasm and the doctor had to run. He was black in the face—the baby, I mean; and little Jamie was all out of breath from hurrying. Well, young man, did you decide on a room or aren't they good enough?"

Daughter Is
Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to me by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors about your other girls are taking it with good results." Mrs. Clarence Jenkins, Box 14, Thomas, Ontario.

Lydia E. Pinkham's
Vegetable Compound

Lydia E. Pinkham, M.D., L.L.B., Mass. U. S.
and Gilbert, Ontario, Canada

W. N. U. 1827

"They're much too good," replied John Carter, as he brought a chair for Charman, and took the one by Grandma herself. "I shall feel like royalty, sleeping in that magnificent old bedstead."

"The four-poster? Then you've taken the room in the ell. Well, it'll make things easier for Charman, even though it doesn't seem exactly proper let you sleep where the help used to. It's sunny, I'll admit that, and warm in winter. Father Davis wasn't one to put his help into a cold room. They're human beings like the rest of us. He used to say, 'and they shan't freeze so long as they'll carry up the coal.' That was the first furnace in Wicksfield," she added promptly. "Fools came from far and near to see it, and stand on the registers. I remember old Miss Buzzell saying that it was immoral to be so comfortable."

"I venture to guess that Miss Buzzell wasn't a cheerful person to have about," said John Carter with a smile.

"And you've guessed right," replied Grandma with decision. "Nothing ever suited Bessie Buzzell. Yes, you can smile, but that was the name they gave her in the cradle, and she carried it to the grave, no man ever having the courage to ask her to change it. The weather was always too hot for Bessie Buzzell, or too cold. If the sun shone, she'd be sure it would rain next day; or if it rained, she was certain it would rain all the week. The minister preached too long, or else he wasn't giving all the measure for his salary. Father Davis used to say, 'when they get you a harp in Kingdom Come, don't ask a bassoon. Here's the doctor now, but Lizzie Baker's stopped him at the address the driveway. May I see it now?'"

"Not till you've eaten a 'proper breakfast,'" replied Grandma. "Pass me the toast, Charman, I think he's too shy to ask for a second piece."

"I'm not," denied the doctor, with his engaging grin, "but if you continue to feed me so bountifully, and your neighbors refuse to give me any work, I shall put you to too much weight."

"You could stand a few pounds more and not be too fleshy," Grandma retorted, scrutinizing him closely. "Seems to me your cheek bones need more covering."

"Grandma," reproved Charman sternly, "you mustn't make personal remarks. And if you've really through breakfast, Doctor Carter, I'll get the key and we'll inspect your office. I don't see why we didn't think of it before."

"I'm glad it's set flush with the sidewalk so I can see from the window who comes to you for medicine," continued Charman. "She had forgotten to take the door and glanced up as Charman reached for a key hanging on a nail. "Dear me," she sighed, "how many years it is since I used to see Father Davis take that very key down every morning. It doesn't seem nearly longer than yesterday, and it's almost a life time. Be careful not to soil your dress, dearie. There'll be a sight of dust on everything."

"Who to come?" questioned the doctor. "I'll help you across."

Grandma shook her head.

"I've got to watch for the R. F. D. man, Ezra Bascomb. He promised to bring me a message from Emmy, and he might forget it if I don't wave."

"You open the doors and windows and let the air blow through. It'll be a good day's work to clean it up."

As the key grated in the lock and the door swung back, John Carter uttered an exclamation of pleasure.

"What a peach of a place!"

"Isn't it?" said Charman. "And this room at the side will make a splendid waiting room. I used to long to use it as a whole thing for a play room. Isn't there one of the windows beautiful and the mantel, too?"

"You'd know that this was built in the days when carpentry was an art, and a good builder took pride in his work. Joseph Ames carved those fluted columns himself. I remember hearing granddad tell about it when I was a little girl. Let's open the windows. Grandma's right, it will take a lot of work to get it clean."

"I'll hire some one to do it. It's much too dirty a job for you."

Charman laughed.

"It's not easy to hire any one in Wicksfield; and many's the time I've tackled worse things than this! If you'll pitch in and help—"

"I'll do every bit of it, while you sit still and give the necessary directions. My fingers itch to begin; but I promise Doctor Howe to go his rounds with him this morning. And don't you dare touch it in my absence, young lady! I would have you do your job like this for a—"

"Look here," she said. "You ought to have a place to see your patients. They'll have none of you so long as you go to Edward Howe's. Why not use Father Davis's office? It's handier to the street, and as good a location as you could find."

"You mean that little old place in the yard here?"

Grandma nodded.

CHAPTER IV.

Charman stood on a stepladder in the room that had been Great-grandfather Davis's law office. The doors and windows were opened to the breeze, and one passing could have seen from the outside the swirl of shaking of a dustbin. For three weeks the doctor had occupied the ell bedroom. It had been Grandma's suggestion that he use the small building across the driveway for an office. They were at breakfast one morning when the idea came to her.

"Look here," she said. "You ought to have a place to see your patients. They'll have none of you so long as you go to Edward Howe's. Why not use Father Davis's office? It's handier to the street, and as good a location as you could find."

"You mean that little old place in the yard here?"

Grandma nodded.

Stony Plain and District.

Mr Jacob Miller, Wembley, is in town this week.

Mr L M Larson, proprietor of Royal Cafe, moved his household effects up from the Holborn home on Monday, and the family is now located in the Bank of Montreal building.

Barber Trapp has had his torsorial parlor remodeled and the interior finished in royal blue. It is his intention to instal a booth for ladies' hair dressing.

A meeting of Stony U.F.A. Local is called for Sat. March 15, with an election of officers.

The brilliance of Stony's great whiteway was added to last week, when Mr Larson installed another electric sign at his Royal Cafe.

United Church Notes.

On Sunday last the subject of the sermon was "The Contest of Christian Progress," Hebrews 12, 1.

The lecture by Mr Gibson on mountain climbing at the local church, Monday evening, proved to be very interesting.

Plans are being made for special services at Easter-time, with a service in Stony Plain on Good Friday morning (April 18) and at the same place Easter Monday, with special speakers.

Wedding Anniversary.

A party of relatives and friends to the number of 40 gathered on Sunday last at the home of Mr and Mrs A C Schum, to help celebrate the latter's third (or leather) anniversary. Games and amusements of all kinds were participated in by the young people. The young couple in whose honor the celebration was given were the recipients of a number of beautiful and appropriate presents from their friends.

Sporting Notes

Our Junior hockeyists got an invitation to play a game at Onoway Sunday last, but owing to the inability of the manager to pick up a representative team, the trip was postponed.

It begins to look as if we had come to the end of our local hockey-playing season.

It's a hard job to get hockey experts to agree on some points. While the Schaukelstuhl hockeyists were re-playing an old game down at Jim's Coffee Haus the other night young Mr Faktitis offered some comments, gleaned from his wide and varied experience, on how our players could improve their stick-handling by studying the play of the good City teams. He had begun a lengthy discourse along this line when the "Big Sweetie" knocked his argument on the head by saying that if he had anything to do with the Club next season, he'd see that our Senior players be prevented from witnessing the big-time games in the City, as the locals always played worse at their next game here, trying to practise some of McNeill's or Pettinger's tricks." Thassa fact!

Additional Sports on Page 6

Duffield Doings.

Mr Geo Scheideiman was a business visitor to Stony on Monday.

The Women's Institute met last week at the home of Mrs Clements, with the president, Mrs W J Taylor, in the chair. Arrangements are being made for the holding of a public entertainment near the close of this month. An effort will be made by the members to have the curling rink building converted into a Community hall. The next meeting will be held on Tues. March the 25th.

Holborn Happenings.

The dance given in the hall Friday night by Martin's orchestra was well patronised.

Mr Emil Miller, who recently purchased the quarter section at the corner of the Scotti road, will shortly commence the erection of new buildings thereon.

The Executive of Holborn Rifle club, Messrs H J McDonald, A Burger, C Kimmerly, have sent in a requisition to the C.O. of M.D.13 for the usual complement of rifles. These are expected to arrive in the course of a few weeks.

CARD OF THANKS—Mr and Mrs L M Larson wish to convey their heartfelt thanks to all their friends in Holborn district for the generous gifts to them, on their leaving the district to reside in Stony Plain.

Hansen's Corners.

Mr George Clausen lost one of his race horses that he had recently purchased from Mr R Washburn.

Sleighing is about done for in this district, as the roads are pretty bare.

Another big dance is billed to be held at the Schoolhouse next week.

Mr Gust Erickson has finished sawing wood at Mr Sterling's.

Mr Julius Clausen has sold his farm on sec. 8, 51, 2, 5 to Mr A Colour.

Mr Karl Groskoppe is arranging to reside in the City the coming summer.

Harry Launder has signed a contract to visit his fellow countrymen in this settlement on his next visit to this country.

There ain't been no more black foxes shot around here lately, but an enterprising rifleman can take a shot at the black crows.

With the Municipal election settled to almost everyone's satisfaction, the next big question is, How about the new Community Hall?

"Big Jim" got a letter from Scotland on Tuesday, telling that his old friend Ian Fitzdoodle had had his arm broke last week when the bagpipes backfired.

Here and There

(482)

The bull sale at Kamloops this year is scheduled for March 19 and 20. The show is becoming the most important event in western B.C. records. A big bull of Alberta breeding has been received.

The Maritime Lumber Exchange Board have extended their purchasing plan so that now farmers' clubs and lumbermen may purchase feed at a considerably lower price than formerly. Several carloads of feed have already been ordered.

The directors of the Canadian Pacific Railway have decided to apply to Parliament for an amendment to the Canadian charter, permitting it to change the par value of shares of its ordinary stock from \$100 to \$25 per share with the exchange of one share of the old stock for one share of the new. This action has been dictated by a desire to place the common shares within the reach of investors of moderate means and thus increase the number of shareholders, particularly in Canada.

Miss Doris Parkes, of Vancouver, becomes "Her Majesty" of the 1921 Banff annual winter sports carnival, following her election as Queen at the recently concluded gathering of the Canadian winter resort. She won against rivals from Calgary and Australia and was crowned amid colorful pageantry in the closing hours of the carnival.

"Not how much land settlement work but how good it was" was enunciated as the policy of the British Colonization Association by W. M. Neal, general manager of western lines, Canadian Pacific Railway, at the annual meeting of the association held at Calgary recently. Mr. Neal said that during the past five years this association had assisted 4200 families on \$44,284 acres at purchase price in excess of \$88,000,000.

The largest terminal grain elevator at any port on the seven seas has recently been put into operation at Vancouver by the Alberta Wheat Pool. It has a capacity of 5,150,000 bushels and is known as Vancouver Pool Terminal No. 1. During the crop year ended July 31, 1929, Vancouver shipped 98,138,210 bushels of grain as compared with 79,714,513 bushels or 24,15,653 more than the previous year.

More than \$50,000,000 will be expended on new equipment, new line construction and improvement to existing equipment and roadbed by the Canadian Pacific this year, making an account by an announcement made recently by E. W. Beatty, chairman and president of the company. Of this huge sum \$14,000,000 will be expended in new equipment, conversion and improvement of existing equipment: \$3,000,000 in telegraphs; Canadian Pacific's hotel and restaurant plant will have a \$2,500,000, rail facilities in the west will account for \$10,000,000 and \$7,500,000 will go on expenditures for eastern Canadian lines. The railway will spend \$1,000,000 for maintenance during 1930, but it does not include large expenditures in ocean steamships now in hand, and on immigration work.
